

Online store

Show your understanding of Angular.

1. Complete project from tutorial [Your First App](#)
2. Implement component “**Products**”, which shows the list of products. Each product must have following properties:
 - a. image
 - b. name
 - c. description
 - d. rating
3. Each product should be linked to a real item from [Kaspi.kz](#)
4. Must be at least 10 products
5. Buttons “Share” for each product, by clicking, user should be redirected to Whatsapp or Telegram with the link to the product
6. Optional: Add product image gallery, minimum 3 images.

GOOD LUCK :)
