

Show your knowledge for HTML/CSS/JavaScript

Recommended folder structure in your repo:

- WebDev
 - Lab 3
 - JavaScript Info
 - ToDo app

First task:

1. <https://javascript.info/>
 - a. till section **data-types** inclusively
2. Collect all the solutions in one folder and push it to your git repo

Second task:

Create a simple todo list app with all working actions.

- adding new item
- marking as “**done**” (checkbox)
- deleting item

ToDo List

ToDo List

<input checked="" type="checkbox"/>	First item	
<input type="checkbox"/>	Second item	
<input type="checkbox"/>	Third item	

GOOD LUCK :)
